Wheat Reached Dollar Mark In Winnipeg

May Option Goes Over The Line To 101½

Dollar wheat became a reality in the Winnipeg grain exchange last Saturday for the first time in three years as futures soared upwards to register gains of 1½ to 2½ cents. May options, which topped the long sought dollar mark, ended the session at 101½.

July closed the short session at 92½, Oct. at 95½ and Dec. at 96½.

In Chicago wheat shot up to \$1.25 the same morning. The report from experts that Canadian crop was damaged was the main incentive in Chicago.

Hilarious Riot At Monarch Next Monday

"International House," Will Have Three Day Run

Paramount's new musical comedy hit, "International House," one of the most hilarious, yet funtful most amusing productions ever to leave Hollywood, opens a three day showing at the Monarch, Monday next. It's enormous all star cast of stage, screen and radio favorites are: Peggy Hopkins Joyce, W. C. Fields, Rudy Vallee, Stuart Herrick, George Burns and Gracie Allen, Sam Maritza, Colored Stompie and Budd, Cab Calloway and his orchestra, Rose Rosemarie, Bela Lugosi, Leta Stetter, Sterling Holloway, Edmund Breese, Franklin Pangborn and Lumsden Hare. A comedy group of chorines known as the Girls in Celophanes present the dance numbers.

PEACE PACT WAS SIGNED IN ROME

The four-power European peace pact was signed in Rome last Saturday by Premier Mussolini and representatives of France, Germany and Great Britain.

The accord designed to guarantee tranquility among European countries for a period of 10 years, facilitate reduction of armaments and lead to improvement in economic conditions, was given official approval in the Duc's office in the Palazzo Venezia.

Mr. O. A. Vogstad visited Calgary last week and was the guest of his sons, George and Austin who were among the entertainers at the Calgary Stampede. George owns and operates several divisions of the Castle-Erich Hirsch Studios.

The chief feature of his section is illusions. These he invents himself. He has been several years with this company and has shown in all the important cities of the United States and Canada. Austin is a young artist of Philadelphia and is now with his brother. He makes rapid charcoal portraits, gives lectures on and demonstrations of his art. Stampede visitors from Redcliff were, no doubt, interested in those sections of the big show which are under the personal management of the Vogstad brothers.

Bingville Picnic Was Great Success

Annual Event Was Last Saturday

Bingville's Annual picnic held last Saturday attracted a large crowd from the whole community and the day developed as one of the most successful in the history of that enterprising settlement.

A good program of sports was arranged for the occasion and both old and young enjoyed heartily and enthusiastically into the spirit of the day.

Soft and hard ball games were also played and refreshment booths on the grounds were well patronized.

The days program was brought to a close with a dance in the evening and the hall was taxed to capacity to accommodate the large crowd which attended. Those from Redcliff who attended report it was a most successful and enjoyable evening.

Great credit is due to the committee in charge for the very successful manner in which the day's program was carried through. Members of the committee were: Messrs J. M. I. Hanson, W. J. Teewinkle, W. A. Pratt, P. A. Bertwistle, J. C. Jones, E. Christensen and J. W. Stevens.

Miss Sarah Davis is the guest of Miss Edith Collard at Elkwater Lake for her vacation.

Mr. and Mrs. W. King and Ethel motored to Calgary last week returning on Saturday.

Mr. and Mrs. Collard and family have taken a cottage at Elkwater Lake for the summer months.

Mrs. R. Cann was hostess at the tea hour on Tuesday afternoon in honor of Mrs. MacMailland of Castor.

Terrific Wind Storm Strikes Town Yesterday

Damages Roof on the Dominion Glass Plant Warehouse and Demolishes Old Palace Building--Blows Box Car Down Siding--Gardens and Trees Damaged--No Casualties

One of the most terrific wind storms that has ever been experienced in this district swept through town yesterday afternoon about 4:30 and left a trail of destruction behind it.

The wind, which was of cyclonic proportions, came up suddenly and drove everyone to cover in fear and trembling.

It is estimated that over a thousand dollars damage was done at the Dominion Glass plant, where part of the roof on one of the large warehouses was blown off; loose lumber, sand and soda ash were blown in all directions and several windows broken. A loaded box car was blown from its moorings at the plant and went careening down the siding to the main line and on past the station before coming to a stop.

The old Palace building which was being torn down, was completely demolished and large portions of the roof were blown over to the next street, several sections of it lighting on Mr. Wright's barn there. The roof was torn completely off a box car on the Brick & Coal siding, and roofs garages and outbuildings in all parts of the town were torn to pieces. Considerable glass was broken at the greenhouse and several telephone poles in all sections were blown over and wires broken by flying lumber.

A bad mess was made of garden stuff, flowers, shrubs and trees.

To gale continued for about half an hour at an estimated rate of 75 miles an hour and took in a path about three miles wide. Fortunately there were no casualties although several were reported to have had close calls. Among those were several children who were playing in the Palace building a few minutes before it collapsed.

Considerable damage is reported in Medicine Hat.

Alberta Receives Least Federal Aid

Alberta has received less federal government assistance than the other three of the four prairie provinces according to figures released in Edmonton by Hon. Hugh Guthrie, minister of justice during his visit here. Alberta has received \$5,718,000, indirect relief advances, and \$6,482,000 in expenditures a total of \$12,200,000.

British Columbia received a total of \$14,833,000. Saskatchewan \$35,928,000. Manitoba \$33,440,000.

Monday afternoon, 24th, at 3 p. m. the senior W. A. of St. Andrew Church are holding a jubilee of home cooking, ice cream social; also raffiaing a table centre. Tickets 10c. In the evening of same date bridge and whist social at 7:30; parish hall or church lawn, most suitable to weather, Monday, July 24th.

Nasty Accident At Softball Game

H. Van Wert Badly Hurt In Collision

In a soft ball game here last Friday evening Henry VanWert met with a nasty accident as a result of which he had to spend several days in the hospital.

He and Bill Paterson were running to catch a fly ball when both collided. Henry was so badly hurt that he was taken to the hospital where it was found his nose and cheek bone were badly splintered. His lower lip was also lacerated and four teeth were knocked out.

The game may be called so-called but Henry is now of the opinion that what he ran into had nothing soft about it. We are glad to report he is now getting along nicely.

Mr. H. Champ was a week end visitor at Calgary.

Mrs. B. Bassett of Medicine Hat spent Tuesday in town with her daughter Mrs. R. Cann.

Mr. O. W. Wooding returned on Sunday from a fortnight's vacation with his parents in Calgary.

Mr. Ronald Hulland of Watrous, Yukon, and Mr. Thos. Hulland of Kimberley B. C. arrived on Monday to spend some time with their brother John on the latter's ranch north of town.

Redcliff Girls Win From League Leaders

Score 14 to 4 Against Sawways Last Monday

By a score of fourteen to four the Redcliff softball girls defeated the Sawways girls in Medicine Hat last Monday evening. Despite the difference in the tally the game was, with the exception of one inning, a good one for the fans. Both teams played good classy ball but the Redcliff girls were much better batters, and also had a slight edge on the field work. In their second innings our girls netted seven runs by a series of well placed hits and keen basestealing. They duplicated this performance again in their fourth when another six runs were crossed the plate and clinched the game.

For a village the size of Medicine Hat one would expect a much better diamond than the one on which the game was played. It was in terrible shape.

The standing of the teams in the girls league is as follows:

	W	L	Pct.
Sawways	8	2	.800
Redcliff	6	4	.600
Estons	5	5	.500
Woolworths	0	9	.111

Rev and Mrs Stewart and June left on Monday for Roseland where they will holiday a few weeks. Miss Martha Barber accompanied them.

Redcliff Reminiscences

Taken From Our File of July 17, 1914

Redcliff has secured a fine stall in the main building for the W. A. C. C. exhibition. This space will be shown a fine exhibit of goods manufactured in Redcliff.

The Men's Christian League will have a social and musical evening in their rooms on Friday. Mr. Robt Hamilton will give an address on the Redcliff Oil Fields.

Mr. Bennett and Miss Tilly Wooda both of Redcliff were married in Swift Current last week.

Miss Georgia Gordon and Mr. Henry Samson were married in Medicine Hat on July 18th.

The school board accepted the tender of McCoy and Schupper of Med. Hat for the erection of three village school; to be opened this fall.

Two junior baseball teams played a good game here on Wednesday. Campeau and Wylson did good work in the box for the Giants.

Over 6,000 protests have been received by Assessor J. B. Singular against the assessments made by him this year. Judging by the expression of those in authority the assessment will be cut a million or two. It seems probable that the mill rate will be about sixteen mills.

Gives Name to Rockies Pass

naming a pass in the mountains after Mrs. Gibson Pass has hitherto been anonymous and lies between Shadow Lake and the Twin Lakes, below Ball and Storm mountains in the valley of the Bow, midway between Banff and Lake Louise. Not far from the mouth of the Bow, and located in one of their most picturesque sections, Gibson Pass was actually discovered by Mr. Gibson when he was planning the route to be taken by Trail Riders last summer and himself hiked over the trail between the two lakes.

The name was conferred recently by the Geographic Board of Canada in honor of Mrs. Gibson's work as poet, novelist, promoter of musical and folk festivals and founder of the Order of Trail Riders of which she has done inestimable work in bringing the stories of Canada to the knowledge of the world. Lay-off down the Pass, with most of Mr. O'Brien and himself hiked over the trail between the two lakes.

Recognition of the years of devoted labor by J. Murray Gibson, general publicity agent of the Canadian Pacific Railway, in popularizing the Canadian Rockies throughout the world, has been given by the

Quality That Is Unsurpassed

"Fresh from the Gardens"

Canada And Its Foreign Born

Because of the many uninformal and therefore inaccurate statements frequently heard to the effect that the population of the three prairie provinces of Canada are largely of foreign birth, a recent census bulletin issued from Ottawa, and based on the last census (1931), is of interest and value. It is revealed that out of a total population of 2,353,299 in the three provinces, 1,808,574 are of British birth, and 544,805 of foreign birth, and of those born under the British flag no less than 1,492,657 were born in Canada.

But, it is frequently argued, these figures do not give a true picture of the racial division of our Western population inasmuch as many of those born in Canada were born of parents who themselves were foreign born and their children, although born in Canada, are, in all intents and purposes, the same as if born in foreign lands. While in many cases, probably most cases, this assumption is not a sound one, the census bulletin recently issued is of particular value in that it classifies the percentage of the entire population.

It is shown that the population of the three Western provinces having both parents born in Canada numbered 505,456; having both parents British born outside Canada 517,403; having one parent Canadian born and the other British born 145,176. That is, 1,213,035 or more than one-half of the total population are at least second generation Canadian or British born. To these may be added another 191,009 where one parent is either Canadian born or British born and the other foreign born.

Contrasted with this is the population born of parents both of whom were foreign born. Their number for the three provinces is 945,725. Subtracting, therefore, the total foreign born of 544,805 from this figure, we find that the number born under the British flag, and mainly in Canada, of foreign born parents is only 400,770. These are first generation Canadians.

The figures are not only interesting but reassuring to those who are anxious that Canadian and British blood be the dominant factor in the predominance in this land. Another reassuring and gratifying fact is indicated by the figures that 191,009 of the population in these three provinces are the offspring of marriages contracted between Canadian born or British born men and women on the one hand and with foreign born on the other hand. This inter-marriage between the races is bringing about the development of a distinctly Western type of Canadian, and one that gives promise of being a very fine type, physically strong, mentally alert, and in themselves the Anglo-Saxon love of liberty, respect for law and authority, capable in government, with the love of music, poetry, art, and handicrafts which characterizes the peoples of continental Europe.

Coincident with the publication of this recent census bulletin, Hon. C. H. Caban, Secretary of State at Ottawa, issued a warning to judges of whose jurisdiction falls the duty of naturalization of aliens to exercise care in the performance of such duties. He drew attention to the danger of certain malcontents applying for naturalization solely in order to protect themselves from the danger of deportation, or, in other words, seeking Canadian citizenship not out of love for Canada, or to advance Canadian interests, but in order to secure for themselves greater freedom in undermining Canadian laws and institutions.

And a Saskatchewan judge, commenting on the same subject, is reported in the daily press as urging the Federal Government to use it that applicants for naturalization are supplied with literature which will enable them to learn something about Canada. Some assistance, he said, should be given to those who wish to become citizens, neither should it be their duty to learn something about Canada. Some assistance, he said, should be given to those who wish to become citizens, neither should it be their duty to learn something about Canada.

Canada has probably been somewhat careless in the freedom with which citizenship has been conferred upon alien residents in the past, and negligent of its duty to these. All too frequently naturalization has been obtained solely in order to protect to themselves lands could be secured. Other thousands have taken out citizenship papers in order that they may vote, but possibly without any very intelligent idea of what the duties of their Canadian citizenship really involve.

Five years residence in Canada will not in itself make a Canadian citizen. Ability to read and to write does not in itself constitute intelligent citizenship. The mere possession of naturalization papers, while it does make a man or woman a citizen in the eyes of the law, does not necessarily make such person a citizen of Canada in the true meaning of the word "citizen."

It should be a matter of national policy to inculcate right ideas and high ideals in the minds of all new-treated citizens. To that end it would seem that something more is required than so many years residence and the taking of the oath of allegiance on the one hand, and the handing over of a piece of official paper by the Government on the other hand. There should be some formal ceremony at the vital significance of becoming a citizen of Canada would be emphasized.

We believe these new citizen would themselves welcome some such procedure. The vast majority of them have acquired a real love for Canada. They adopted it as home, and desire to make it that not only for themselves but for their descendants. They are anxious to serve Canada, to make it better and grander. They would like advice, inspiration and guidance. The State should provide it.

Invited To Conference

Kilgiving, Jamaica.—The Canadian government has been invited to send delegates to a trade conference this summer of representatives of the various British West Indian islands. Among the questions to be dealt with will be the growing and marketing board of the vegetable and fruit crops of the colonies.

He (at 11 p.m.)—"Did you know I could initiate any bird you can name?" She—"No, I didn't. Can you initiate a homing pigeon?"

National industries in Bolivia are speeding up production.

Any Looseness of the Bowels Is Always Dangerous

When the bowels become loose and diarrhea, dysentery, summer complaint and other bowel troubles set in, immediate attention should be given and the discharge checked. Dr. Powell's Cat-Of-Strawberry has been used for the past 50 years. It is rapid, reliable and effective in the action. A few doses generally all that is required to give relief. Get it at your drug or general store, put only by The T. Millburn Co., Limited, Toronto, Ont.

Japan's Pearl Crop

Planting Of 40,000 Acres Of Waters Largest In Years

The pearl plantings in Japan this year, in contrast to most crops, will be the largest in years. More than 40,000 acres of quiet waters have been sown with more than 3,000,000 pearl oysters, and thousands of people are employed. The pearl crop here has had a remarkable decline for seven years.

Millions of seed pearls or tiny bits of mother of pearl, are skillfully inserted into living oysters for the pearl crop. The oysters slowly proceed to cover these irritants with a secretion which transforms them into pearls. The oysters are placed in steel cages and suspended a few feet above the floor of the sea from great rafts. Twice a year they are brought to the surface, cleaned and treated to prevent disease. Some 60 per cent. of the oyster harvest will be demolished, the rest being marketed.

The annual crop is valued at several million dollars.

Declares War On Slums

Great Britain Starts Five-Year Drive Against Filth Of Homes

Great Britain has declared a five-year war to the finish on her slums. Tumbledown alley dwellings, basements, and insanitary "back-to-backs"—hotbeds of tuberculosis, rickets, anemia and other diseases—are slated to be wiped out.

The government's move against the plague spots as motivated by the prevailing low building costs and low rates of interest on money, together with a desire to ease the problem of unemployment.

To insure immediate action, the minister of health has called upon all housing authorities in England and Wales to submit by Sept. 30 a list of all slum areas and every plan of clearing all such areas by 1938.

Each program is to include a list of the areas in each locality, the number of houses to be demolished, the number of inhabitants affected. A list of areas where improvement by reconditioning is necessary and the times for complete clearance, improvement and rehousing of the displaced dwellers.

"The time limit is the very essence of this program," says Sir Edward Hilton Young, Minister of Health. "The time limit is the very essence of this program."

It must be fixed, and fixed absolutely. No one knows the complete extent of the slum problem in the land, though the estimate generally given is that 1,000,000 dwellings must be given over to the program for every area.

An up-to-date picture, however, will be available by Sept. 30, the date for the program for every area.

The great mass of the slum dwellers is in the industrial and mining areas. Liverpool, Manchester, Birmingham, Leeds, Bristol, Hull, Sheffield and scores of other cities have serious, insanitary sections.

London, because of the great population crammed into a relatively small area, presents a problem of its own and it is believed that the five-year grace period may have to be shortened for abolition of the worst spots.

In the wake of the government's determination on action, a lively campaign is being pursued by the press to keep the spirit for wholesale and immediate reform at high pitch. The government has received many appeals and the Prince of Wales who knows great areas of the slums by periodic visits, has voiced the support of the royal family.

Latest Soil Thief

"Sawdust-Erosion" Lowers Wheat Yield According To Report

The latest soil thief discovered by the Department of Agriculture, Occurring principally in the North-west the erosion is reported to have lowered wheat yields in that section. For a wheat crop, says Government experts, it is the common practice to furrow the land in the fall and crop it the next spring. The trouble comes because the sawdust from a low level soil on northern slopes because the drifts are deeper there and the soil is not firm when sown on top levels away.

A Dramatic Antidote

As the result of experiments conducted by Dr. W. E. Kowenowen, professor of electrical engineering at Johns Hopkins University, Baltimore, Md., it has been discovered that an electric shock of high voltage is an antidote for an otherwise fatal shock from low voltage.

Empire Telephone

Empire Telephone made another step when service between India and Australia was inaugurated. A short time later, R.F.P. Palestine and South Africa were linked to India. Since then service between India and England was started on May 1. An average of five calls a day has been made from Bombay.

The Niagara Gorge, which is sometimes called the "geological clock," is about 20,000 years old.

Profits of the Australian National Bank last year were greater than in 1931.

Another Kind Of War

Boycott Severs Trade Relations Between Latvia and Germany

That great German Reich and the very small republic of Latvia are engaged in a certain kind of war. Each has established an embargo on all imports from the other.

It began very unofficially when certain Latvian citizens decided to boycott German goods and German merchants as a protest against Hitlerism. Germany took official notice by barring Latvian Baltic. Latvia took the next step, a very official one, by barring all imports from Germany; and Germany made the thing complete by putting up bars against all Latvian trade.

At first glance it appears that little Latvia must be the greater sufferer. Her exports are almost wholly agricultural, and Germany has been her best customer. But on the other hand Latvia imports nearly all her manufactured necessities, and in the past has purchased most of them in Germany.

Neither nation is likely to suffer very seriously but Germany will really lose more than Latvia. The German gesture of boy-boycott a small state for the offense of an unofficial boycott is similar in principle to the Japanese "punishment" of Shanghai for boycotting Japanese goods. It is far from heroic.

Five Years Without Rain

People Of Shanghai, China, Are Dying Of Starvation

Farmers who fear for more rain are at days it may have been only a matter of days or weeks since there was a downpour, should be thankful the chances of birth did not bring them into the world in the province of Szechwan. There, they have been no rain for five years. Normally, it is a fertile land, one of the richest agricultural territories in the country, and populated by men and women of the physique and steady industry.

Today they are starving. They have no crops, or live stock to speak of. They have died by tens of thousands of starvation. They live remnants from railways and other means of transport, and from ordinary commerce. They have suffered and died in silence in the hinterland of a country that is almost too vast to comprehend.

Five years without rain! Think of that. We're not so ill off after all! —The Times-Journal.

Outlay Not Only Making

Much More Goes Into Making and Keeping a Home

Everything worth while costs something, although there may be no thought of a home cost structure. First of all, the house and furnishings mean a big outlay. Then there is love, endurance, high spirits, and sacrifice—things that make a house a home. When we consider the cost of a home, how careful we ought to be of not doing anything that would interfere with its happiness. Nor should we think only of our own home; we are not also responsible for the well-being of the home of others?

Depends On Viewpoints

The holiday-maker is he who refrains from turning gulches and crowding so much into his brief days away from business that when he returns the routine of it becomes an intolerable monotony. This work-a-day life is not at all monotonous if we regard it rightly.

Valuing Your Friends

You must value your friends for what they are, over and over, and they are not, remembering that they must care for you at all name fashion if they care for you at all.

Combating Disease

Death Rate From Diphtheria Is Lowered In Manitoba

Seven years ago the diphtheria death rate in Manitoba was 21.5 per 100,000, which meant that 150 children lost their lives in this province every year from this preventable disease. In 1928 immunisation was started in Winnipeg with the result that by 1929 the death rate for the whole province had been brought down to 10.5. In that year immunisation was extended to parts of rural Manitoba, resulting in a further reduction of death rate to 5.1. In rural Manitoba since 1930 there have been 65 deaths in immunized territory and only 18 deaths in the much larger population of the unimmunized territory. There have been no deaths among immunized persons.—Winnipeg Tribune.

Wages Being Increased

New Westminster Lumber Mill Also Employing More Men

An increase of 10 per cent. in wages, affecting 750 men, has gone into effect at the Fraser Mill plant of the Western Lumber Co., Ltd. New Westminster, B.C.

The increase follows a better demand for lumber and an increase in price. The Fraser Mill plant is turning out a quarter of a million feet of lumber daily and the shingle mill is working double shift. Employment at the plant has increased from about 450 men to 750 since last winter.

A Comfortable Margin

Population Of New York Nearly Million Behind London

The population of New York City according to a census by the New York Chamber of Commerce is now 7,318,000. This still leaves London the world's greatest city by a comfortable margin. Its 1931 census showed a population of 8,302,818. Next to New York comes Berlin, with over 4,000,000, then Chicago with 3,976,000. There are eight cities in the world with a population of more than 2,000,000, and thirty-one with more than 1,000,000.

Communist To Handle Wheat

Bucharest, Roumania.—The Roumanian government has decided to set up a purchasing commission to ensure a remunerative return to its wheat farmers by buying large amounts of the cereal at a price fixed by the administration.

The Queen of Norway recently purchased three English hunting horses.

The heavy influx of tourists is boosting business in Italy.

Always ready—Inexpensive

W. N. U. 2003

Scientists Assert That Extremes Of High Temperatures Will Mark The Summer Of 1933

If vagaries of summer weather to date have not been sufficient to bring conviction that extremes of high temperature will mark the season, it may be added that science to the extent that it ventures opinions upon such subjects—agrees with the popular view that this summer is to be extraordinarily hot.

The reason given by the supposed experts, if accepted without too much critical examination, is fairly simple. We may expect a good number of hot spells, they declare, because less cold air is going to move in this direction than has arrived in other recent seasons. The full explanation is a trifle more involved.

Heat in any region is produced by three causes: the direct effect of the sun's light; direct hot air from place to place, and by the way air masses are warmed through the increase of pressure when descending from higher atmospheric levels. This third variety of heat is the same as that produced when air is compressed inside a automobile tire. The first extreme heat wave here this year, the meteorological report was issued by movement of air northward after it had become over-heated through such a process of descent and compression in the great south of the Gulf of Mexico.

If we are to guess about future weather, though, we must return to consideration of the sun for it, after all, not only generates heat but is also the chief force in compressing air and moving it, whether cold or heated state. An interesting factor this year is that the sun is expected to generate an increased amount of heat, because the sun's activity is on the increase and, contradictory though it may seem, the more blazes there are on the sun the more heat it emits.

But this heat, to continue with the meteorologist's tale of contradictions, ordinarily brings cooler weather in this area, for the warmth becomes transformed into solar energy, stirs the atmosphere and brings large clouds of cold northern air in this direction. There is, however, the settlement of time lag connected with this solar energy, since it works large clouds of heat storage in the ocean. Immediate weather conditions show a tendency to correspond with solar activity of eight or nine years ago. In the period which will control our weather this year, according to the scientists, sun energy was on the increase and, as a result, we are now in a time of decreasing atmospheric circulation. That means, if they are right, that we were in the first place; less cold air is coming this way.

All of which, it is to be feared, leaves guessing about the weather almost as dangerous a game as in the past, even though the scientists, like the earlier weather seers, are not a little more certain. The type of the simple terms, seem confident that the secrets of nature are growing less and less secret to them, and that it is a bit more than they forget we told you so. Or the scientists did.—Toronto Evening Telegram.

Radio Station Moved By Plane

All Northland Is Now Linked With Outside World

An entire radio station and all its delicate equipment has been moved by air from Lindley Bay to Cameron Bay by Royal Canadian Corps of Signals with the co-operation of the Canadian Airways.

The station, equipped with both short and long-wave apparatus, is functioning satisfactorily, it is stated. It is the first time on record such a feat has been accomplished.

Captain Stuart Hastings, commanding officer Royal Canadian Corps of Signals, announced every strategic commercial centre in the northland is now in touch with the outside world. Two standard radio stations, erected by the Dominion government at Fort Rae and Fort Chipewyan, have commenced operation.

China Gains Morale

Pride May Have Started Winding Of Chinese Unity

China has surprised the world and very likely herself by managing to follow up the Japanese truce with a civil war of her own. Only a few weeks ago, when Tokyo's armies were sweeping over North China, people said that there would be no peace with Japan because no party in China could make such a peace. Now, however, against the wishes of the Chinese people, the National Government, signed a truce which seems to have found general acceptance in the country.

The hammer blow of the Japanese truce may thus have begun the winding of Chinese unity. Japan's case before the world is based chiefly on the contention that China is not a nation. The charge may well have pierced through the crust of factional and personal selfishness to the core of Chinese pride.—New York Times.

Autogiro May Replace Observation Balloons

British Air Ministry Has Ordered One For Experiment

Observation balloons, the "Gloomy Deam" and other types so familiar to Canadian troops in the war, today are possibly on the way to oblivion. The British Air Ministry has ordered one of the latest type wingless autogiro "windmill" aeroplanes for experimental use as a likely substitute for the balloon. It has been learned, Air Ministry experts believe the autogiro will prove superior to the balloon for observation work because of the lesser vulnerability to attack and ability to resist attack or retire quickly in face of a powerful hostile force. The type of the simple terms, seem confident that the secrets of nature are growing less and less secret to them, and that it is a bit more than they forget we told you so. Or the scientists did.—Toronto Evening Telegram.

Dean Inge To Retire

Gloomy Deam To Resign From St. Paul's On Account of Advancing Years

Dr. William Inge, the so-called "Gloomy Deam" of St. Paul's since 1913, announced his intention to resign the position next summer on account of advancing years. He is 70 years old.

He intends to spend his retirement in the neighbourhood of Oxford, where he is understood to be negotiating for a house.

From His Standpoint

When Mose was told that poor Ratius had been shot dead by Judge Hicke while he was stealing the judge's chickens, he merely replied: "Oh, well, it might have been worse."

"How could it have been worse?" indignantly asked the informant. "Poor Ratius dead! He judge just naturally blow de head right off his head. What could be worse den dat?"

"It might have been worse," replied Mose. "If de judge air off de gun de night before, he might have blown de head off me."

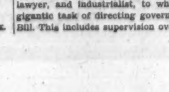

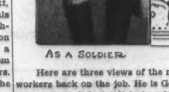

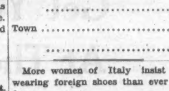

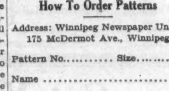

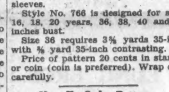

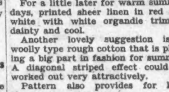

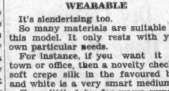

A Novel Proposal

Headlights on sheep is a novel proposal put forward by J. N. Corbett, Montana rancher. A few animals wearing collars fitted with a flashlight battery and a red reflector on the lamp, he claims, will protect a herd of several thousand sheep from sinking coyotes and rattling cougars. He finds the light does not bother the sheep.

Peru has a new retail sales tax.

By Ruth Rogers

Publisher Picked Good Men

Cyrus H. K. Curtis Gave Employees Credit For His Success

Cyrus H. K. Curtis, Philadelphia publisher, who when he died was the publisher of prosperous newspapers and even more prosperous magazines having nation-wide sales running into the millions, ascribed his success to the men who worked for him. He once said:

"The main point with me always has been in getting somebody to do a job better than I could do it myself. I knew what I wanted, but I could not always accomplish it. The success of my organization has been due entirely to the people I have found."

The late Edward K. Bok, editor of the Ladies' Home Journal, was probably as well known, if not more so, than his employer. It was he and not Cyrus H. K. Curtis who made that magazine. The personality of the men at the head of the editorial staffs is imprinted on the pages of the Curtis publications.

Unquestionably Mr. Curtis was a man of wonderful business instincts. He started in the newspaper line with a capital of three cents when he purchased the last three papers from a hawkeye and sold them at the full price. With his six or nine cents he bought a few more papers next day and pyramided his earnings day by day until at length he decided he would make newspapers and magazines his life work. Probably he was more a business man than a journalist. If his first business deal had been bananas he might have become a great fruit merchant.

The salient fact in his career, however, as he said himself, is that he picked men who could do certain jobs better than himself.

That now lots of successful men succeed. Sometimes they recognize that fact in a material way—and sometimes they don't.—St. Thomas Times-Journal.

Left-Handed Children

Should Not Be Forced To Use Right Hand

Kettering education committee has forbidden its teachers to stop left-handed children from using the left hand for writing and other manual work. This has been done in consequence of a report by Dr. C. B. Fogg, the medical officer, whose attention has been directed to certain cases of stammering. The inquiries revealed that a number of these cases were left-handed children who had been converted to writing with their right hands.

Dr. Fogg cited facts showing that of 41 left-handed children who were compelled to use the right hand 24 became stammerers. In a further case 12 right-handed children were trained to use the left hand, and within five months all developed stammer.

What Puzzled Him

She watched him gaining down at their first look. Wonder, admiration, rapture, incredulity, chased across his face. She stole up and said, tenderly: "Tell me your thoughts, dear."

"How can they make that out for fifteen shillings?"

Business is looking up to those who are looking it up.

Injure Chilean Trade

British Restrictions Force Ranchers To Slaughter Sheep

British restrictions on meat imports have forced Chilean ranchers to slaughter 225,000 sheep from which the only marketable product they obtained was tallow.

Ordinarily almost all the sheep raised in this region are exported to England. Meat imports into the United Kingdom from non-Empire sources were restricted in the Ottawa trade agreement.

Have Fleets To Meet About

There is a village in Durham where the old folk proudly boast that if their age were tallied together that they would stretch back to the days when Adam was a lad. Shoolby Bridge is the place where people live happy and content. It has only a few hundred inhabitants, but they include several notable men and women and a score of 80-year-olds, while people of 60 and 70 are looked upon as youngsters.

Competing With Apples

Consumption of apples in Canada does not show any great change, though slightly higher in the period 1928 to 1932 than in the preceding years. There is growing competition from the banana and citrus fruits.

Beer was regarded by the Egyptians

of 4,000 years ago as one of the most popular medicines. Ancient Egyptian physicians prescribed beer for various ailments.

London Conference Delegates Meet on Common Ground At World Garden Party

Women Stand Adversity Well

In Many Cases Depression Has Been Of Benefit To Them

Although depression has driven a great many men to insanity and nervous disorders, its effect on women has been largely beneficial, according to Dr. Karl M. Bowman, assistant professor of psychiatry at Harvard medical school.

The effect, as far as nervous disorders are concerned, Dr. Bowman said, "has been much like the effect on many women during the war. They were used to sitting around idle and worrying about themselves, but once the war got under way they occupied themselves with Red Cross work and other activities and forgot their imaginary troubles."

"The depression has given these women something to do, and its effects have been a blessing to the idle rich type, who had too much money for their own good and nothing to occupy themselves."

"Men, on the other hand, have probably increased nervous disorders. Many are broken under the strain, but strange to say, the wives of men hit by adversity are, on the whole, not nearly so badly affected."

A study of hospitals throughout the world revealed no increase in the number of women psychiatric cases since the depression, the greatest number of almost every hospital being men."

Theory Often Falls Down

Burglar Given Keys On Leaving

Modern penological theory believes that criminals in prison should be taught some useful occupation, and that their release be given back to society tools possessed, but here's a case where the theory fell down.

A study of hospitals throughout the world revealed no increase in the number of women psychiatric cases since the depression, the greatest number of almost every hospital being men."

"When I got out the officers gave them back to me," he replied.

Insurance Period Near Expiry

Ex-Servicemen Will Not Be Insured After August 31

The period within which ex-servicemen can make application for insurance under the provisions of the Returned Soldiers' Insurance Act expires on August 31, 1933, according to a bulletin issued by the Dominion Council of the Canadian Legion by J. R. Bowler, general secretary at Ottawa. Briefly the Act provides for the Government to make insurance contracts with any returned soldier domiciled and resident in Canada or in any Dominion, and to pay a refund, for the payment of \$500 or any multiple thereof, but not exceeding \$5,000, is the event of death.

All the world represented at a garden party.

Belting the vast grounds of historic Windsor Castle, His Britannic Majesty King George, his previous Queen and members of the Royal family, "Among those present": Delegates from sixty-six countries, in attendance at the Empire Conference, More than 2,000 guests; many men of many minds, in formal attire; their ladies radiant in the bright, balmy air of summer. A babel of tongues.

Never before has there been a social function of this unique nature. Never before was it possible. During recent weeks leading statesmen of the civilized world have been converging on old London, "the heart of all creation," to discuss the problems of the world. They gathered on various business; to seek relief for a sorely afflicted world; they were greeted and welcomed by His Majesty the King; and after finding their bearings and getting down to work, His Majesty King invited them to a week-end garden party.

That is the way they do things in hospitable England. Business is business; but there must be the weekend relaxation. "All work and no play makes Jack a dull boy." But more things are accomplished during these week-ends, at these gatherings, in garden parties, than are dreamed of in the philosophy of people who do not know England and its people. And at this garden party in Windsor Castle the grounds and contacts may mean much later on in the conference deliberations.

Consider the nature of this assemblage of people. Each hemisphere is well represented. There were "men of the Northern zone," and dark-skinned guests from the Orient. East met West. Also men from the Republics of North and South America; from Africa, from the Dominions of the British Empire, from the older European lands, and from "regions Caesar never knew." On the grounds were men and women with the may pole developed through many centuries of Old World civilization, and guests from the newer countries who may have felt at first the spiritual surroundings of an ancient castle at the heart of English culture. But none of them, before they attended a world garden party. In that they were on equal footing.

His Majesty the King provided for the truly commensurate opportunity to get acquainted. Of course, there would be no politics at world garden parties but it seems probable that, in such delightful environment, delegates from the far places of the earth were brought together in a friendly way that they would get along better when they returned to work in the great hall of Kensington Museum, where the business of the conference is carried on. The personal touch is mighty in its influence. After all, in the broader world, nations being the same, the world are much alike; and they all were represented at the King's garden party.

It will be recalled that on the opening day of the conference a threatening pall hung over proceedings, but that this was dispelled by better understanding among the delegates. There were also dark, rain-filled clouds over Windsor Castle grounds as the guests began to assemble, but the kindly sun decided that this party must be a success, and the afternoon was spent under delightful weather conditions. These may be regarded as hopeful auguries. And, taken all together, there is closer association between the delegates of the world garden party than prosaic observers may imagine.—Toronto Globe.

Feasting Of The Sky-scraper

Population and industrial trends indicated in the census reports are now recognized by one profession particularly effective. William R. Ludlow, Vice President of the American Institute of Architects, says the skyscraper era is at an end and the time of smaller cities, widespread suburban communities, and decentralized industry at hand.—New York Evening Post.

Stainless Steel Train

Contracts have been completed for the construction of a stainless steel train for the Chicago, Burlington and Quebec railway, Canada, which is traveling 130 miles an hour. The train will comprise three cars built as an articulated unit, powered by a Diesel electric motor and will be ready for experimental service in actual public use this fall.

CLOSING THE BANK

In conversation with a bank official the other day, the Review was told that the people of Redcliff who were doing the most complaining about the branch of the Imperial Bank being closed here were, in many cases, the ones who were most to blame for its being closed. The reason given was that they did not support the local bank, but instead did their banking business in other centres. By so doing they were helping other banks at the expense of their own local bank.

No doubt at least some of those to whom the bank official referred, are those who complain loudest when others go out of town to do other lines of business.

From what one can gather on the street however, there is another side to this question. There are those who are of the opinion that the bank, by its way of doing business, recently, rather antagonized the non-organized business, and forced its patrons away to where they could get better treatment.

A WAY TO END WAR

A writer of an eastern weekly recently advanced an idea for making war impossible in future. His plan is, by controlling the minerals essential for the production of war materials. In his article this writer points out that for months prior to declaring war in 1914, Germany had been importing from other countries, tons of minerals which go into the manufacture of war material, where previously she had been importing only pounds. Then he makes the astounding statement: "It is truly marvellous to that during the war Canadian soldiers were confronted and killed by weapons made of metal obtained from Canadian ores. The same, he claims is also true of the British Isles, France and United States."

The writer's solution to this unfortunate, unnecessary and inhuman state of affairs is that the governments of the different countries where these minerals are found in abundance, should control their output and export. He claims that while no one country has the control of all the minerals necessary for the making of war materials, the British Empire and the United States together, control more than two-thirds of the mineral tonnage which the world consumes. And then he says: "It would seem a relatively small task to bring together two nations, two great political units, with their extensive commercial organizations, and vote their interests under some possible political control and with such a resulting organization absolutely control the essential minerals which go into the production of armaments and munitions."

Walter: "Has your order been taken?"
Walter: "Yes and so was my photograph when I was a child."

Here and There

Almost \$20,000,000 was spent in the manufacture of toilet preparations, soaps and toilet accessories in Canada in 1932. A recently issued report estimates that the total value of the former products was \$12,500,000. And of the latter \$14,750,000.

Forty boy scouts of Oregon and Washington made the first leg of their 4,000 mile trip to Hudson Bay in the Princess Kathleen, Seattle to Vancouver. They are travelling C.P.R. across Canada to Quebec, where they will sail for England on the Empress of Britain.

Alaska and the Yukon hold their popularity as summer playgrounds judging by the simple list of passengers sailing north to Skagway in Canadian Pacific coastal liners. Many of them are mining and business men, but the majority are summer tourists attracted by the rate reductions for summer Alaska travel.

Forty-three years of "active, loyal, and efficient service" with the Canadian Pacific Railway closed June 30 with the retirement of W. A. Hiltner, General Western Freight Agent, Chicago. He was succeeded by E. Cordie, Assistant General Freight Agent, and the office which the latter vacated was relinquished.

For the first time since its foundation 25 years ago, a Governor-General of Canada was present at the annual closing exercises of the Boys' Farm and Training Institute of the Bank of England, President of the London, Midland & Scottish Railway, and one of Britain's leading economists and recently when he sailed for England on the Canadian Pacific liner, "Empress of Britain" after a short visit to this continent.

There are tangible signs of business and economic improvement in Canada and the United States. Mr. Joseph W. Brown, Director of the Bank of England, President of the London, Midland & Scottish Railway, and one of Britain's leading economists and recently when he sailed for England on the Canadian Pacific liner, "Empress of Britain" after a short visit to this continent.

Ten Honolulu youths between 14 and 17 years of age arrived recently at Vancouver on Canadian Australasian liner "Albatross" en route to the Yukon where they will spend the summer in scientific research and adventure. They will sail north to Skagway, go into White Horse where they will build boats for the run down the Yukon River to Dawson.

Motion pictures of herds of caribou swimming the river current of the Yukon River and other striking scenes of wild life in the far north have been gathered by Harry Pollard, Associated Screen News photographer, who returned recently to the Princess Royal in Vancouver after six weeks in Alaska and the Yukon. He went on to Banff and Lake Louise where he will photograph mountain scenery.

A total of 16,225 persons visited the 13 national parks of Canada in the fiscal year 1931-32. These great reservations cover an aggregate area of 13,000 square miles. Each has its own distinctive characteristics. There are three scenic and four national parks in Alberta, four national parks in British Columbia, one scenic park in Manitoba and one in Saskatchewan; one historic park in Nova Scotia and one in New Brunswick, one recreation park in Ontario and two island parks in the West.

"Television" Shopping

at
EATON'S

Won't be long now until television will come to be a scientific marvel and become as common place in our homes as radio is today. Turn a dial, and we'll not only hear events taking place thousands of miles away—we'll actually see them, too. Distance will mean less than ever.

But even now EATON'S Mail Order Catalogue is just about as good as television. Open up your Catalogue and there before you are all the comforts of the home—staple fabric—smart clothing—and all illustrated so clearly—well described so accurately that you might just as well be shopping for them personally at one of our great Western Retail Stores.

Add to this, the swift delivery service for which EATON'S is so famous, and EATON'S "satisfaction guarantee" policy, and it is more apparent than ever how clearly EATON'S approximates television in service. Distance means so little to the Mail Order shopper.

Science Invades The Laundry

National Research Council Solves Knotty Problems
Science has invaded the laundry. No more holes in the great room sheets, no more ragged towels, no more saw-edged collars, no washed-out shirts. The national research council has harnessed science to the laundry.

The Eastern Canadian Laundry Men's Association are to hold a convention in Toronto and will be informed that by the application of science to their laundries they can cut \$100,000 a year from the nation's laundry bill.

Leaders in the industry some time ago told the national research council their troubles. Here a tablecloth came out of the laundry full of holes; there a bunch of colored towels came out with that washed-out complexion, stained shirt collars and cuffs refused to come clean except under drastic methods that would damage the fabric.

What could be done about it? The research council established a textile and laundry branch. It was found, not a modern Mrs. Gump or even a laundry manager, but a scientist, Dr. O. M. Morrison.

In a miniature drying cabinet small squares of linen were hung around by instruments and the temperature and humidity of the air were controlled. In all manufacturing cities sulphur dioxide from the smoking factory chimneys pollutes the air. Absorbed by wet fabrics, this gas is converted into sulphuric acid, and the housewife wonders how on earth those holes came in her good linen tablecloths and sheets.

Dr. Morgan's cabinet is giving the sulphur dioxide to his little fabric squares, and then he'll know just what does really happen.

The laundering of fabrics wastes not far more money than the actual wear and tear, and the laundries of Canada have for years been cutting this loss to a minimum.

One laundry refuses to believe the evidence. It has been washing clothes for years and years and their many customers had seldom complained. They did not feel called on to change. As a concession they agreed to make the improvement suggested by the laboratory. To their amazement their tensile strength losses were cut in half. They not only put into effect all the other recommendations, but sent their own experts to Ottawa to learn more about laundries.

"You're bringing in your practical problems to you!" Dr. Morgan, the young Ontario-born scientist who is doing these wonders, was asked.

"Yes," he replied. "I've been clubbed claimed that a laundry had found a large quantity of table linen, and tests showed the linen was of the family weaving, and the linen manufacturer made a handsome adjustment to the club and the laundry's reputation was cleared."

Doctor Has New Idea

Suggests Skin Irritants Or Foods May Cause Crime

An experiment to discover whether "sensitization" of the nervous system to dust, medical drugs or even the wrong kinds of food plays any part in producing psychopathic conditions that lead to crime is being made with 50 inmates of King's Island prison. Dr. V. C. Branham, deputy commissioner of correction, relies on this test to show whether the individual is affected by certain kinds of dust, pollen, drugs, or foods to the extent that he may become "unstable." In this state he is restless, and in some cases may commit impulsive acts, Dr. Branham has found.

King Must Give Approval

Variety artists who appear before the King and Queen are chosen at a secret meeting in London at which a provisional program for the command performance is drawn up. This is sent to the Lord Chamberlain, the Earl of Cromer, who in turn submits it to the King. Every item must have the approval of the King, and until this has been made known the names of the artists chosen are kept secret.

Decide Against Sweepstakes

The Newfoundland Government has decided against participating in sweepstakes for revenue-raising purposes. Several proposals submitted in the last few months have been rejected, according to a government announcement. The stand of the government is that promoters of sweepstakes must deal directly with the Lotteries Licensing Board.

Turkey has ordered \$500,000 worth of German railway material.

W. N. U. 2001

New Tuberculosis Treatment

Hot Baths and Electrical Treatment Show Good Results

Possibility of the treatment of tuberculosis by use of hot baths and high frequency waves was given before the American Sanatorium Association convention in Toronto, when Dr. E. S. Marlette, of Chicago, a member of the committee on treatment, described experiments he had conducted in this field.

A majority of a number of patients who had undergone the hot bath or high frequency treatments over a brief period had shown marked improvement, he said. Of seven who had taken hot baths over a month, six had shown X-ray improvement, in some cases marked, and on three who had been given high frequency treatments two had shown improvement. All of the patients had been in sanatoria for years without showing any improvement whatever.

"I am not advocating this as an accepted treatment," Dr. Marlette emphasized. "But I am offering it to you as an idea and I would like you to try it. Time alone will tell whether this is a step forward in therapy tuberculosis, or that we are all crazy."

His paper was received as a session by the association. His experiments, he explained, had been prompted by the long-standing relation between normal temperature of animals, fowl and men, and their respective susceptibility to human and bovine tuberculosis.

Seven patients were subjected to hot baths which raised their temperatures for one hour each day for four days, he said. For the next two weeks they underwent the baths every other day. At the end of the period six showed improvement.

Automobile Accidents

Fewer Fatal Accidents In 1932, According To Statistics
There were 1,111 deaths from automobile accidents in Canada in 1932, as against 1,316 in 1931, says a report of the Dominion Bureau of Statistics.

The death rate from this cause was 10.5 per 100,000 population, as compared with 12.7 in the preceding year. Since the year 1926, the first for which the vital statistics of all provinces of Canada were compiled on the same basis, 1932 was the first year to show any significant reduction in the number of deaths from automobile accidents. The year 1927, 1928 and 1929 each showed a marked increase over the preceding year, while the level reached in 1929 was approximately maintained in 1930 and 1931.

Reforestation Policy

Proposals For Plan Covering Long Period Of Years Advanced For Saskatchewan

A policy reforestation and utilization of certain forest products is advocated for Saskatchewan by Hon. J. P. Bryant, K. Minister of Public Works of the province. Definite proposals for reforestation covering a period of from 50 to 75 years are being made by the minister, who also stresses the feasibility of establishing a large crocheting plant at Prince Albert for the treatment of policy pine and lodge pole pine. Mr. Bryant suggests the adoption of a jack model after the English forestry plan, which would extend over a period of years, and that trees be planted in all areas suitable for their growth.

Prefer English Plans

The Canadian people prefer English musical comedies to Hollywood sex and gangster films, says P. S. Revell, Canadian representative of the British International Pictures, who dealt further that improved photography, the English accent, and better acquaintance with British stars is creating a Canadian preference for English films.

World's Largest Libraries

The world's largest libraries in the world, according to numbers of volumes are: The Public Library of Congress, Washington; the British Museum, London; the New York Public Library, New York; the Bodleian Library, Oxford.

No Rogues

Refusing to acknowledge John Cabot, ancient explorer, as discoverer of North America or even the part of the continent of which the government has rejected the proposed inscription on a monument to the mariner the Italian colony of the city will present to Montreal.

British shipments of gasoline from black sea ports in the first three months of this year total 2,385,000 barrels.

MEET "PETER" and "PUNCH" THE HORSE HEROES

Here we see "Peter" and "Punch," the two famous H.A.S.C. grey horses, as they appeared at Olympia, London, recently. These two horses took part in the retreat from Moscow and were awarded the three medals of the Great War. Now, too old to work, they are semi-retired members of the Royal Army Service Corps at Aldershot, and are kept by officers and men out of their own pockets.

Spirit of British People

Britain Further Along the Road To Normalcy Than Any Other Country

Of all the nations that participated in the Great War, none had a greater load to carry both during and after the conflict than Great Britain. Then came the economic collapse to further test the frame-work and make onerous demands on people and Government. Today it seems to be the consensus of opinion that, despite the burden of debt which weighs her down, Britain is further back along the road to normalcy than is any other country. Admittedly, she is fundamentally the strongest. Economists will not find the explanation of this in columns of figures and charts and graphs. The reason lies in the spirit of the British people—Hamilton Spectator.

Careful Use Essential

Substance Used In Explosives and Dyes Makes Fat People Thin

Disinfecting, a substance used in making explosives and dyes, also will make fat persons thin. Dr. M. L. Painter, medical professor from Stanford University, told the Pacific Division of the American Association for the Advancement of Science here.

But he warned women not to storm the drug stores, for improperly administered disinfectant in a short time will kill them with a fever of 110 to 115 degrees. In proper doses, though, he said, it melts fat as fast as it melts.

Lucky Parachute Jumper

James "Storring" professional parachute jumper, of Iqaluk, New York State, narrowly escaped death, three times in one week. In two jumps—only an hour apart, he was rescued from the waters of Great South Bay by a police boat, and suffered painful injuries when his chute collapsed a hundred feet above the ground. The third time he landed on high tension wires, and was saved by firemen.

A man wrapped up in himself makes a very small package.

Modern Science in Cooking

Trained Workers Preparing Standardized Recipes For Best Results

One of the big contributions the scientific in home economics laboratories have been making to the home-maker is in the standardization of recipes.

Believing that a great deal of the uncertainty in cooking was due to uncertain measurements, trained people have been working with this problem. Now the accepted standard is that a cup means exactly two-fifths of a pint (eight ounces). There are 16 tablespoons in a cup and eight teaspoons in a tablespoon.

Trained workers have also been deciding exactly how much of each ingredient should go into a recipe to give not only a palatable result but a first-class one.

The most recent efforts have been directed toward the combining of ingredients. It is hard to know when to beat and when to stir and how long, and precisely how to perform a large number of cookery tasks. Modern science is standardizing these important procedures.

Some Weather Indicators

Several Ways To Determine Whether Rain Is Coming

Look at your bedroom window and, if there is no mistletoe on the glass in the early morning, rain is extremely unlikely. On the other hand, when the windows are moist when the cake is dry expect a fair day, but if the soap is soft and wet, rain is sure to come.

When you come down to breakfast see what happens when you put a lump of sugar in your tea or coffee. If the air bubbles stay long on the surface, forecast the weather, for this means that there is a good deal of moisture in the air and that, as well.

When you come down to breakfast see what happens when you put a lump of sugar in your tea or coffee. If the air bubbles stay long on the surface, forecast the weather, for this means that there is a good deal of moisture in the air and that, as well. The weather is in low and is in a condition associated with unsettled weather. On the other hand, if the bubbles burst soon, you can tell that the air is very dry and that there is a high pressure system in existence, both of which indicate fine weather.

More Than a Coincidence

Birth Of Twins Occur In Three Genes

Once in a while one must be just an occurrence; twice might be a coincidence, but when for a third time the same family parents, after having seven single children, become parents of twins, it would seem the stark and hereditarily are inexplicably tied together.

Mr. and Mrs. Amos Weber, Jr., of Waterloo, Ont., recently became the parents of twin sons. These came after seven children had been born to the parents.

Years ago Mr. and Mrs. Amos Weber Jr. had seven children and were then presented with twins, one of them being Amos Junior.

It must be a record.

Decide For Yourself

A surgeon, an architect, and a politician disputed which belonged to the oldest profession.

"The surgeon claimed the distinction because he was made from Adam's rib. That, he contended, was surgery."

"But," said the architect, "before the advent of Adam order was made out of chaos. That was architecture."

"Admitted," said the politician, "but who created the chaos?"

Mysterious Expedition

Capt. Bob Bartlett, explorer, has a secret rendezvous with adventure in the land where the north wind comes from. Leaving for the Arctic in his famous schooner "Edna M. Morris," he is ready to say exactly where his area is going. "We hope to penetrate an spot about which virtually nothing is known," he said mysteriously.

Tiger Preferred

The big game hunter was telling his stay-at-home wife all about his encounter with the Bengal tiger and how he had finally shot it. "Yes," he said up. "It was a case of the tiger or me."

"I'm so glad it was the tiger, dear," said the wife sweetly. "Otherwise we wouldn't have this lovely rug."

Norway's whalers produced 1,260,000 barrels of whale oil in the season just closed.

Beastly girls of England are wearing Japanese cloths this season.

Lord Strathecona's Home

Is Now Haven For Aged Ladies In Reduced Circumstances

On the door of one of the most stately mansions in London is inscribed a simple brass plate which bears the inscription, "My Mother's Home." It is a tribute to a Canadian mother, who has long since passed away, by a son who has attained riches and power from the humblest beginnings. There are few more picturesque figures in Canadian history than the man who had this house built.

Donald Alexander Smith, who came to this country as a junior clerk in the Hudson Bay Company from Fort, in Scotland, and rose to become governor and chief commissioner of that rich and powerful organization with unusual powers over a vast territory than many kings have enjoyed. Later he wielded a strong influence in the Canadian Parliament and crowned a great career as High Commissioner in London for Canada.

Honors were showered upon him by universities both in Canada and in Britain, and institutions with which he was associated conferred upon him the highest plots in their gift. Queen Victoria elevated him to the peerage as Baron Strathecona, and Mount Royal of Glencoe in the County of Argyle and of Montreal, Canada. The nobleman's early morning, rain is like the roll of the British peerage, as well as being a record of the names of the hands of men of eminence in all activities of the country.

Queen Mary, the present King and Queen Mary spent several weeks at Strathecona's home in London. The names of the British peerage, as well as being a record of the names of the hands of men of eminence in all activities of the country, are recorded in his name. Yet these members of the British peerage form only a small proportion of the distinguished circle of visitors. Sixteen members of the Canadian and twenty-four lieutenant-governors were entertained in this palatial home of Canada's Grand Old Man, as well as archbishops, and bishops, generals and admirals, judges and men of science. For some years after the death of Lord Strathecona the mansion and the grounds and buildings were tenanted only by the old staff of servants.

A change remark, regarding the sale of a building in which gentlemen in reduced circumstances might find a haven of rest in their declining years, was the seed sown in the fertile soil of the kind heart of its founder.

And now this great group of palatial dwellings, together with the furniture and rugs just as Lord Strathecona left them, has been converted to Lord Atholstan into a magnificent sanctuary.

Praise For Canadians

Earl Of Bessborough Has High Opinion Of People's Courage

"I have only seen Canada in a time of crisis, and I have seen the people of Bessborough told an audience at the closing exercises of the Boy's Farm and Training School at Niagara. Sixteen members of the Canadian and twenty-four lieutenant-governors were entertained in this palatial home of Canada's Grand Old Man, as well as archbishops, and bishops, generals and admirals, judges and men of science. For some years after the death of Lord Strathecona the mansion and the grounds and buildings were tenanted only by the old staff of servants.

Should Have Objected

Mr. Richards was persuaded to buy a parrot that could jabber in several languages. He ordered it sent home.

The same day his wife ordered a chicken for dinner. On leaving she said to the cook, "Mary, there's a bird come in from Canada. Have it cooked for Mr. Richards when he gets home."

The parrot arrived first, and Mary followed. "That's a nice bird," said the parrot. "What's this?" exclaimed Mr. Richards.

"But, for goodness sake, Mary," he said, "it is a parrot that can jabber in several languages."

"Then why the dickens didn't he say something!" asked Mary.

Had Nothing On Him

A woman hired a taxi cab. The door of the cab was hardly closed before the engine started with a jerk and the cab began to race madly along, narrowly missing lamp posts, trams, policemen, and becoming frightened, the woman remonstrated with the chauffeur:

"Please be careful. This is the first time I ever rode in a taxi cab."

Interesting Local Items

Mr. and Mrs. L. Fairbairn and son, Barton, arrived by motor from Sask. on Sunday and will spend a few days with Mr. and Mrs. W. J. Fairbairn.

Mr. and Mrs. Trembath and Velma Jean accompanied by Mrs. Melville and Jack, left by motor on Monday for a holiday in the mountains.

Miss Myrtle Black of Regina who has been visiting at the vicarage accompanied her sister Mrs. Stewart and Mr. Stewart on a motor trip to Rossland and other western points.

Among the Redcliff families noticed at Elkwater summer resort Sunday were the following: Newham, Congram, Lepard, Myers, Hargrave, Kitchen, Hall, Collard, Sheasby, Black.

The Redcliff Boy Scouts, now at camp at Elkwater Lake have been awarded first prize for neatness, cleanliness and layout of their camp. They are having a splendid time and are expected back home this week end.

Mrs. Hicks, accompanied by her daughter, Mrs. Maillard and son Donald, were weekend visitors at Elkwater.

Messrs R. Simpson, G. Thompson and Mr. and Mrs. Geo. Men are motored to Calgary on Saturday, returning Sunday.

Miss McBean, accompanied by Miss Olive McLean, Lillian Corbett and Elva Wright, spent Monday and Tuesday of last week visiting her sister Mrs. R. Erskine Pow. These four members of the teaching staff in Winnipeg are taking a motor trip to Calgary, Banff, Waterton Lakes and intervening points.

The grasshopper plague around town and district is at its worst at present and much worse than has ever been experienced here before. The trouble appears to have been that those concerned left it too long before getting after them with the poisoned bait. Grain crops and garden stuff have already been damaged considerably.

FOR SALE, a chesterfield suite for sale cheap. Apply to Mrs. B. Tonks, First street
